

- ❑ Transparent or Solid
- ❑ All Plastic True-Union Design Allows for the Continuous Mixing of Liquids
- ❑ True-Union Design

Key Features

The Truflo® ProMix® Series Static Mixers have been Engineered to allow for the in-line continuous blending of fluids within a pipeline.

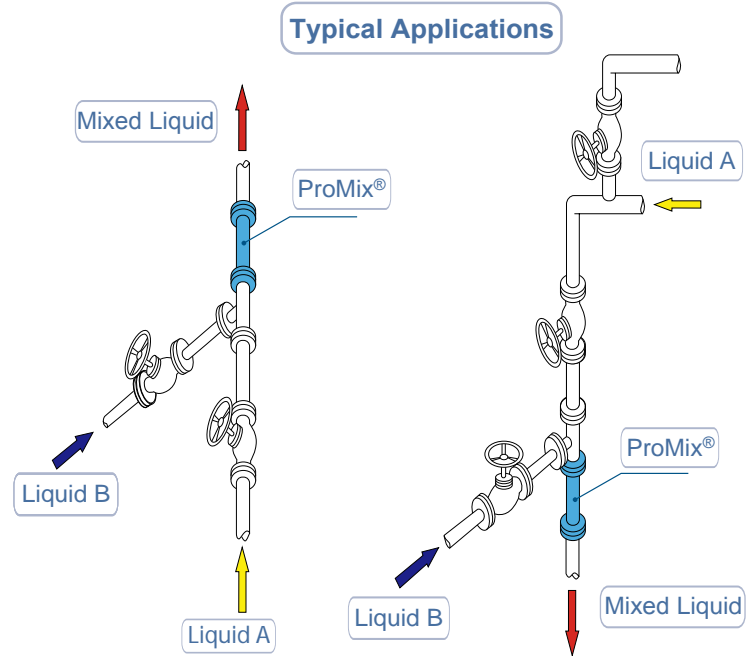

With no moving parts, static mixers utilize the energy of the flow stream to generate consistent, cost-effective, and reliable mixing.

The Truflo® ProMix® Series Static Mixers are available with true-union or flanged end connections in pipe sizes ½" - 2". The ProMix® Series is also available in transparent or solid, suitable for both indoor and outdoor applications.
